

NATIONAL CHECK YOUR TRANSMISSION DAY

Schedule Your Appointment!

National Check Your Transmission Day – October 21st

National Check your Transmission Day, in conjunction with Cottman's very own TransCheck 21 PLUS Inspection, is a reminder to the ever-busy consumer that regular auto maintenance should include not only changing your oil and fluids, but also checking the transmission, the transmission fluid, and filter. Since transmission repair can be costly, most people are prone to ignore preventable problems.

There are many things that can affect the life of your car's transmission, from poor driving habits to inadequate service intervals to changing seasons. Proactively checking your vehicle's transmission, can help prevent unnecessary, costly repairs and prolong the life of your vehicle by years.

What is the TransCheck 21 PLUS Inspection?

The TransCheck 21 PLUS Inspection is Cottman's FREE and exclusive check of your vehicle's transmission. This includes a road test, electronic scan and a thorough visual inspection of the transmission, to determine if your transmission problem can be repaired without the transmission being removed. The TransCheck 21 PLUS Inspection helps determine which transmissions must be rebuilt, or it's a simpler fix than that. If it is necessary for your transmission to be "rebuilt," "overhauled" or "remanufactured," Cottman's technicians will explain the process of the rebuild. A rebuilding procedure will be performed per our rigid technical standards and backed by our nationwide warranty.

So, what should you do on National Check your Transmission Day?

1. Bring your vehicle into any Cottman location for Cottman's exclusive TransCheck 21 PLUS Inspection!
2. Be one of the first customers of the day and receive a gift.
3. Ask any of our certified technicians questions about your car's continued maintenance.
